### In your area

Paisley North constituency has the nineteenth highest smoking rate in Scotland.

Within the NHS Greater Glasgow & Clyde area, 30% of people smoke, the highest in the country. The area has the highest rates of deaths attributable to smoking for both men and women. 34% of all deaths in the 35-69 age group are attributed to smoking. Deaths attributable to smoking for men over 70 stands at 29% and for women at 27%<sup>2</sup>.

Intensive cessation group support is provided across the health board area with groups lasting for seven weeks and ongoing one-to one support provided. Support is provided for in-patients including telephone support on discharge<sup>5</sup>.

All pregnant women are Carbon Monoxide tested at booking with referral to specialist midwife smoking cessation advice and one to one sessions in a community setting<sup>5</sup>.

A specific stop smoking course has been developed incorporating sign language in conjunction with a support group for those who are deaf and hard of hearing with workers being trained in smoking cessation<sup>5</sup>.

### National View

It is estimated that 24% (13,500 deaths) of all deaths in Scotland in 2004 were attributable to smoking with 89.5% of all lung cancer deaths attributable to smoking. Amongst those in middle age (35-69) an average of 22 years of life are lost per death from smoking<sup>2</sup>.

In 2003/04 it is estimated that there were approximately 1.1 million adult smokers in Scotland, 27.2% of the adult population<sup>2</sup>.
